Software Engineer specializing in the data layer | 3 yrs in production | Canadian PR | Available immediately

EDUCATION

San Jose State University

Master of Science, Computer Engineering

San Jose, CA, USA

Aug 2021 – May 2023

Charotar University of Science and Technology

Bachelor of Technology, Computer Engineering

Anand, Gujarat, India

Jul 2017 – May 2021

EXPERIENCE

Software Engineer

Celandyne Software Solutions LLC

Aug 2023 – Jul 2026

San Jose, CA, USA

- Built and scaled a production job marketplace serving **1,500+ active users** with React (TypeScript), Node.js/Express, and MongoDB, supporting job discovery, applications, and AI-based interview workflows
- Developed search, filter, and pagination APIs over large MongoDB collections, improving job discovery speed and relevance
- Implemented JWT authentication and role-based authorization, collaborating with candidate, recruiter, and admin stakeholder groups to turn each role's requirements into secure, separate user journeys
- Raised release reliability by adding automated testing and quality gates with Vitest, Playwright, and axe-core accessibility audits

Machine Learning Research Assistant

Charotar University of Science and Technology

Jan 2021 – May 2021

Anand, Gujarat, India

- Achieved **91% accuracy** predicting industrial equipment failure with an XGBoost model trained on 15,000+ records and 25 features of multi-year time-series data
- Built the end-to-end ML pipeline for anomaly detection and failure prediction: data preprocessing, feature engineering, and SMOTE to handle class imbalance

Software Engineer Intern

Larsen & Toubro Technology Services

May 2019 – Jul 2019

Vadodara, Gujarat, India

- Cut computation time from 3–4 minutes to **10 seconds (95% faster)** for **3,000+ users** by building a C#/.NET formula evaluation engine for industrial manufacturing software
- Designed and maintained the MS SQL Server database that replaced fragmented Excel workflows with a centralized system for an oil and gas client, delivered in an Agile team of 18 developers

PROJECTS

Hotel Operations Analytics Platform | SQL, Power BI, Git

In progress

- Modeling raw hotel operations data into a documented star schema with tested, version-controlled SQL transformations
- Building a Power BI semantic model and dashboard structured KPIs first, then drivers, then details

Ice Breaker App | React, Node.js, Python

Jun 2022 – May 2023

- Built a social matching platform used by **350+ SJSU students**, processing WiFi access-point connectivity data into dynamic, availability-based match suggestions

TECHNICAL SKILLS

SQL & Databases: PostgreSQL, MySQL, MS SQL Server, MongoDB, Redis

Data & BI: Data modeling (star schemas), Power BI and DAX (in progress), XGBoost, pandas

Languages: Python, JavaScript/TypeScript, Java, C#

Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, GitLab CI

Monitoring & Tools: ELK Stack, Prometheus, Git, Linux

Spoken Languages: English, Hindi, Gujarati (fluent); Spanish (intermediate)

CERTIFICATIONS

HashiCorp Certified: Terraform Associate (003)

Credential ID: 7868b4b4-72a2-4826-82c3-7644705d10f3
